PERSONAL STATEMENT

Ambitious and highly motivated Computer Science graduate with industry experience. My infectious enthusiasm coupled with a relentless drive for excellence ensures targets are consistently met and often exceeded. My passion for learning leads me to explore more creative and optimal solutions when faced with novel problems.

EDUCATION

University of Nottingham, UK

September 2021 - July 2026

MSci (Hons) Computer Science with a Placement Year - First Class

- Individual Dissertation - 75%
 - Designed and implemented a novel pseudonymity-preserving security protocol in Python
 - Constructed adversarial models and simulated network attacks to analyse the protocol's security properties
- Software Engineering Group Project - 77%
 - Developed a Cyber Threat Intelligence (CTI) visualisation tool with an integrated optimisation calculator
 - Effectively utilised Agile methods to deliver a fully tested and documented product
- Fundamentals of Artificial Intelligence - 88%
 - Trained and evaluated various machine learning models using large multivariate datasets in Python
- Mathematics for Computer Scientists - 82%
 - Demonstrated exceptional proficiency in logical and mathematical reasoning
- Human Computer Interaction - 72%
 - Prototyped low and high-fidelity apps according to design principles and evaluated using ethnography

De Lisle College, 4 A Levels

September 2019 - June 2021

Computer Science (A), Mathematics (B), Further Mathematics (B), and Physics (B)

FULL-TIME EXPERIENCE

Systems Administrator | D. E. Shaw & Co. (London) LLP

June 2024 - June 2025

- Developed GenAI (RAG) system to automate Helpdesk reporting, enhancing insights and improving report quality
- Architected Vault system integrated with internal tooling to securely standardise authentication across databases
- Designed and developed a web app to aggregate API data, simplifying a previously fragmented workflow
- Resolved hundreds of tickets across Windows and Unix, covering network, storage, access, and software issues

PART-TIME EXPERIENCE

Smart Bar IT Assistant | University of Nottingham

September 2022 - July 2026

- Beta test new university software and network patches, analyse data and document results for stakeholders
- Resolve hardware, software, and network issues, minimising downtime and improving user satisfaction

Self-employed Tutor | GoStudent

January 2023 - May 2024

- Independently planned and delivered highly personalised lessons to students of all ages (7-18+)
- Conveyed concepts succinctly and with clarity, resulting in my students achieving the highest grades

SKILLS

Programming Languages: Python, C, Java, JavaScript, Haskell, SQL, Go, ARM Assembly

Tools and Technologies: Git, Kubernetes, Unix, PowerShell, Blockchain, Web technologies, LangChain

VOLUNTARY POSITIONS

Tae Kwon Do 2nd Dan Black Belt and TAGB Umpire: coach students and officiate competitions 2011 - present

Electronic Keyboard Grade 8 Player: high distinctions (>90%) in every exam taken 2011 - present

Hackathon Organiser/Volunteer: constructed schedules, led events and coordinated with sponsors 2022 - 2026

Peer Mentor: provide academic and pastoral support to new students at the University of Nottingham 2021 - 2026

Open-Source Assistive Device Designer: led design and manufacture of custom prosthetic leg cover 2023 - 2024
